PROJECTS

SolecTion (Javascript, HTML, CSS, Python, Flask, React, Redux, PostgreSQL, AWS)

[Live Site](#) | [Github](#)

A full stack Ecommerce clone of the website Stock X allowing users to post photos of shoes and create listings for sale

- Improved user experience by implementing streamlined login and sign up functionalities using React Hooks
- Implemented AWS allowing users to handle user file uploads and retrieval of stored data.
- Added a search bar feature to filter products by the client's request

PhillyRoll (Javascript, HTML, CSS, Python, Flask, React, Redux, PostgreSQL, AWS, Git)

[Live Site](#) | [Github](#)

A full stack video streaming application where users are able to upload, favorite shows, and add reviews inspired by CrunchyRoll

- Collaborated with three other developers to create a media streaming platform within a week
- Utilized github to manage version control efficiently
- Implemented AWS and Amazon S3 to handle user video and picture file uploads and retrieval of the stored data.
- Delegated responsibilities to satisfy project deadlines maintained productivity with group members

PokeBnb (Javascript, HTML, CSS, React, Redux, Express, Sequelize)

[Live Site](#) | [Github](#)

A full stack web-application of Airbnb where users can sign up, create spots, and reviews of their dream vacation stay.

- Configured the Node backend with PostgreSQL using Sequelize ORM for validations and database queries
- Utilized Redux and its dataflow for reliable DOM rendering
- Ensured user privacy and security through React Router and backend authentication measures allowing users to access and modify only their own listings and reviews.
-

EXPERIENCE

HNTB, Project Analyst | Oakland, CA

2022

- **Ensured** financial integrity and transparency by monitoring compliance to internal and external governance requirements.
- **Analyzed** contract, reports, key metrics to provide project assessments, including budget, profitability, earnings variances, and cash flow analysis
